

PRESS RELEASE

**ITINERA WINS PROJECT
FOR NEW “SKURUSUNDS BRIDGE” IN SWEDEN**

- *Itinera signed the contract to construct the new bridge “Skurusunds” with 317 meters of length and 31 meters of width, which will be part of the “Värmdöleden” highway no. 222*
- *This award allows Itinera to enhance its presence in the North European market. In addition to this contract, Itinera is also committed in Denmark within the infrastructure and hospital sectors, for a total of 1.2 billion euro of awarded contracts*

Tortona (AL), January 11th, 2019. Itinera, a Gavio Group company and international player in the construction of large infrastructural works, was awarded the project to construct the new “Skurusunds Bridge” in Sweden.

The initiative, promoted by the Swedish Transport Administration (“Trafikverket”), is valued at € 75 million.

The new “Skurusunds Bridge” is located in the Municipality of Nacka, east of the Capital city of Stockholm. The project is an EPC (Engineering, Procurement & Construction) contract involving the construction of a new steel bridge with orthotropic deck, along with the improvement of the traffic junctions at Skuru and Björknäs.

The new bridge will be a part of the “Värmdöleden” highway no. 222 measuring a total of 317 metres in length and 31 metres in width. The bridge consists of five spans; a single 99 meters span with two side spans on eastern side of 68.4 and 45.1 meters. In addition, two side spans on western side of 63.5 and 41 meters each.

With this new project, Itinera increases its presence in the North European market, characterised by major investments in the transport infrastructure and industrial construction sectors. Currently Itinera has been awarded in the area projects for a total value of around € 1.2 billion (around € 790 million as own share): in fact Itinera is currently involved in the construction of the “Storströms Bridge” in Denmark (measuring 6.5 km in length, the third longest bridge in the Country) as well as two university hospitals in the cities of Odense and Køge.

Itinera is one of the world’s leading EPC Contractors constructing large infrastructural projects. With a portfolio of over € 4 billion in orders, the company operates in the United States (through Halmar International. One of the top five transportation infrastructure sector companies working in the New York metropolitan area), in Latin America, Europe, Southern Africa and in the Middle East.
